Comfortable : Java Script | Express Js | MongoDB | Dom | Api | JWT | Axios | Bootstrap 5 | NPM

Tools : VS Code | Github | Netlify | Vercel | Figma

### Project

---

**Summer Camp Sports:** Type: Full Stack [Live Site](#) [Github](#) > [Client](#) [Server](#)

- Students can booked any class. They can delete bookmarks and also enroll in bookmarked classes.
- Instructors can add classes. By default, the value of the status field will be "pending. Each class will display its status as either "pending," "approved," or "denied," along with a Feedback & Update button. If a class is in the "denied" state, the admin can provide feedback explaining why it was denied.
- Admin has the authority to approve or deny any classes added by instructors. The admin will write the approved/denied reason in a text field and send it to the instructor. Additionally, the admin can assign anyone as an admin or instructor.

**Technology :** React , React router dom , Express Js , MongoDB , Firebase Authentication , Framer Motion, React Hot Toast, Sweetalert, Tailwind etc

**Electronic Toys:** [Live Site](#) [Github](#) > [Client](#) [Server](#)
